

Transport applicability — exact-JVP finite-dose gates by model, layer, and dose (frozen source→final-residual map)

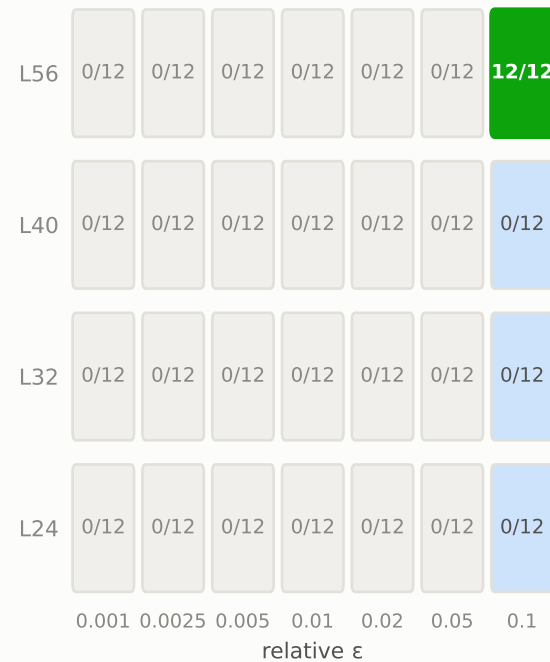

Gemma $\varepsilon=0.10$ mismatch by depth
(0/12 pass per layer; 17-68× above the frozen ceiling)

OLMo-3 Base: rows passing / cell
(licensed iff ≥ 0.90 of 12; green = licensed)

OLMo-3.1 Think: rows passing / cell
(licensed iff ≥ 0.90 of 12; green = licensed)

■ licensed cell (≥ 0.90)
 ■ decision-eligible rows present, fails floor
 ■ no decision-eligible rows (below measurability)
